

Feral Forever

Resource Manager / Rotation Addon

WA Inspiration

- I used this WA as my starting point
- <https://wago.io/Ak7NxBdCc>
- The author also had ones for Rage and Mana that I referenced
- <https://wago.io/p/Rabble>

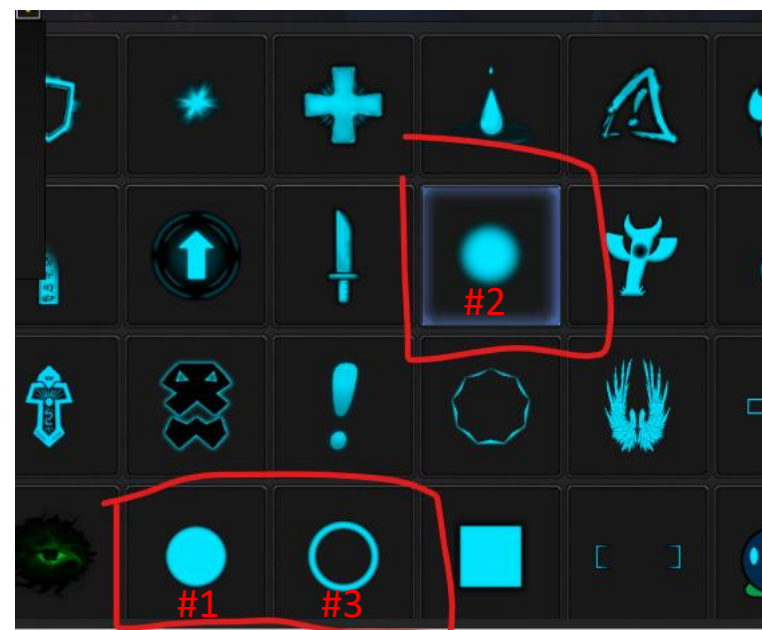

Textures / Assets needed

#	Name
1	Circle – Hard edge
2	Circle – Soft / glow
3	Ring – Very Thin
4	Ring – Glow
5	Ring – Thin
6	Ring – Thin Partial
7	Ring – Bar

Textures #2,4,7 have gradients / contours

The rest can be flat / solid textures (but use transparency)

Examples from PowerAuras

Textures / Assets needed

#	Name	Use for:	Static / Dynamic
1	Circle – Hard edge	Resources tracking	Dynamic
2	Circle – Soft / glow	Background / Framing	Static
3	Ring – Very Thin	Background / Framing	Static
4	Ring – Glow	Background / Framing	Static
5	Ring – Thin	Small ring timers	Dynamic
6	Ring – Thin Partial	Small ring timers - DoTs	Dynamic
7	Ring – Bar	Swing timer; cast timer	Dynamic

Not pictured:
#5
#6

#3

#4

Ignore this ring
(it's the old
classic 2s energy
ticker)

#3

(Looks
better if
thinner and
sharper)

#2

#1

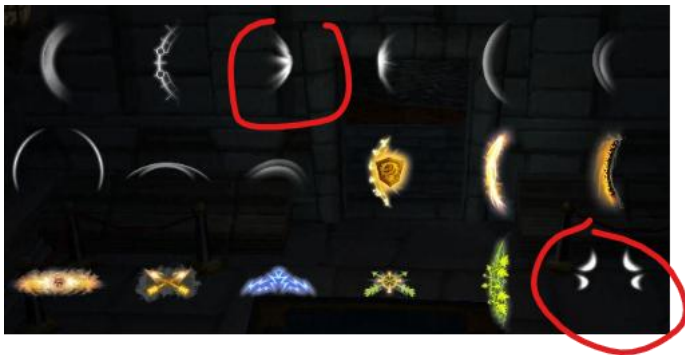

#7

Variables

#	Name	Variables for MVP	Notes / later adds
1	Circle – Hard edge	- Rage_current - Energy_current - Combo_pt_count	- Use 1: Big middle circle is rage/energy bar, fills from bottom; raw value output in middle text - Use 2: five smaller circles at top for combo points fade_in based on count - Add later: Mana when in [noform][form:2,4], number is a % - Add later: Lacerate stacks
2	Circle – Soft / glow	Static – none	Background texture for big middle circle
3	Ring – Very Thin	Static – none	- Border textures for combo points – hide if not in cat form - Border texture for Big middle circle
4	Ring – Glow	Static – none	Background texture for Ring – Bar (swing timer)
5	Ring – Thin	- Rip_duration - Rake_duration	- Position a ring around the 5th combo point for Rip 3rd combo point for Rake - Ring is 100% filled when dot goes up, drains clockwise to 0%
6	Ring – Thin Partial	-	Add later: use a split texture for DoTs, e.g. the Rip circle is split into 6 portions (12s duration; 2s tick frequency); Rake circle 3 portions (9s, 3s)
7	Ring – Bar	- Swing timer - Maul_queued	- Turn red/pink hue when Maul is queue (Curseforge has a better swing timer that changed color for queued Maul, copy their code?) - Add later: cast bar - Add some text “0.2 / 1.0” for swing timer, floating above the CP area
	Proc texture	Clearcasting buff	Texture TBD (e.g. white claw marks at top of circle?) – see next slide

Proc texture

- MVP for clearcasting buff
- Some visual like this as a start
- E.g. PowerAuras use

Features for later

- GCD texture (e.g. Harvey ball looking “Circle – Hard edge” that is scaled to attack speed (so you can time shifts to autos)), sits over the top of big middle circle
- Indicators:
 - Faerie Fire not on target
 - TF is not on cooldown
 - Thistle Tea not on cooldown
 - # of shifts/weaves you can afford based on current mana
 - Enrage available
 - Enrage buff/debuff active
- Short cooldowns (track it like a DoT / being on cooldown is like uptime)
 - Tigers Fury
 - Primal Bite
 - Faerie Fire
- Buffs:
 - Berserk duration
 - Frenzied Regen
 - Potions / procs
 - In Wotlk I used a WA variable calc that added up all my potential proc EAPs and showed a dynamic fill texture based on what was active (for timing berserk)

Out of scope features

- Utility / movement – Dash, Leap, Charge, Bash, War Stomp
- All 1+min cooldowns – Berserk, potions, enrage, nat grasp
- ICDs – omen, weapon procs
